the latest edition of arguments and arguing contains the same balance of theory
and practice breadth of coverage current and relevant examples and accessible
writing style that made previous editions so popular in hundreds of classrooms
the authors draw from classic and recent argumentation theory and research
contextualized with well chosen examples to showcase a narrative style of
argumentation and the values and attitudes of audiences readers learn how to
employ both formal and informal argumentative strategies in an array of
communication forums from interpersonal interactions to academic debate to

politics to business a newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments the ability to argue is necessary if people are to solve problems resolve conflicts and evaluate alternative courses of action while many are taught that arguing is counterproductive and arguments should be avoided hollihan and baaske illustrate that arguing is an essential and fundamental human activity learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion

the primary focus of the updated second edition has not changed it embraces the narrative or storytelling approach to the study of argumentation the first section introduces readers to rhetorical theorists and their principles these significant contributions to the field of argumentation and debate include aristotles views on audiences and the ethical character of an advocate burkes dramatic theory of communication brockriedes metaphorical image of arguers fishers narrative paradigm mills guidelines for testing the causal correlation perelman and obrechts tytecas conception of a universal audience rokeachs definition of values and toulmins model for developing and analyzing argument claims and his conception of arguments as field dependent hollihan and baaskes discussions of these ideas and their applications are easy to follow unencumbered by technical jargon and illustrated with engaging examples drawn from current and well known historical events the key to the success of this text is the authors ability to show readers how foundational principles of argumentation are used in a variety of real world situations the second section covers specialized contexts such as academic debates courts of law politics business and organizations and interpersonal relationships activities that stimulate critical thinking and the implementation of the ideas discussed are provided at the end of each chapter

this volume includes a collection of eighteen essays that provide a decisive input to the study of logic and argumentation theory by some of the finest specialists in

these areas covering the main schools of thought and contemporary trends at the beginning of the 21st century in these essays the authors clarify the status of what we currently call ambiguously and problematically logic and argumentation theory and discuss the no less controversial issue of the relationship between these two concepts when applied to the study of argumentation and its problems at the same time they take stock of the most recent developments of argumentation theory considered as an ongoing research subject it is the first time in the last few decades that a work this comprehensive and up to date on such matters has been published this volume is an essential tool for all of those interested in the study of the relations between logic and argumentation particularly at the university level it provides not only an introduction to these subjects but also the necessary framework for further specialised research development in the future

pondering on problems of argumentation is a collection of twenty essays brought together for anyone who is interested in theoretical issues in the study of argumentation this collection of papers gives the reader an insightful and balanced view of the kind of theoretical issues argumentation theorists are currently concerned with because most of the perspectives on argumentation that are en vogue are represented this volume provides a multidisciplinary and even interdisciplinary outlook on the current state of affairs in argumentation theory some of the contributions in pondering on problems of argumentation deal with problems of argumentation that have been recognized as theoretical issues for a considerable time like the problems of fallaciousness and identifying argumentation structures other contributions discuss issues that have become a focus of attention only recently or regained their prominence such as the relationship between dialectic and rhetoric and the strategic use of the argumentative technique of dissociation in five separate sections papers are included dealing with argumentative strategies problems of norms of reasonableness and fallaciousness types of argument and argument schemes

the structure of argumentation and rules for advocacy and discussion

approaches recent innovations in argumentation theory from a primarily rhetorical perspective

this bestselling collection offers predominantly short arguments on numerous topics in addition it provides a clear and concise introduction to argument including a discussion of the importance of logos ethos and pathos as well as an exceptionally accessible explanation of the toulmin method its 16 chapters focus on current issues each comprising three brief arguments that reflect a range of perspectives a concise research guide concludes the text helping students find and use additional sources including internet sources part v

fallacies and argument appraisal presents an introduction to the nature identification and causes of fallacious reasoning along with key questions for evaluation drawing from the latest work on fallacies as well as some of the standard ideas that have remained relevant since aristotle christopher tindale investigates central cases of major fallacies in order to understand what has gone wrong and how this has occurred dispensing with the approach that simply assigns labels and brief descriptions of fallacies tindale provides fuller treatments that recognize the dialectical and rhetorical contexts in which fallacies arise this volume analyzes major fallacies through accessible everyday examples critical questions are developed for each fallacy to help the student identify them and provide considered evaluations
